CORE_SKILLS

- > Full-Stack (React, Node, Express, MongoDB)
- > Linux (Arch, Ubuntu, Debian)
- > Docker & Docker Compose
- > GitHub Actions CI/CD
- > Bash Scripting
- > Nginx / Reverse Proxy
- > RESTful APIs & Postman
- > DNS / VLANs / SSH

FAMILIAR

- > Next.js
- > React Native
- > PostgreSQL
- > C / C++ (Basics)
- > TailwindCSS / Material UI

EDUCATION

B.Tech

Swaminarayan University,
Kalol (2025 - 2029)

PROFILE

First-year B.Tech student building full-stack web platforms and infrastructure automation. Experienced in React, Node.js, Express, MongoDB, Docker CI/CD, and Linux internals.

PROJECTS

HabitatLedger

React · Node.js · Express · MongoDB · Vite

- > Built full-stack tenant advocacy platform for logging, categorizing, and tracking rental property issues with media evidence and lifecycle management.
- > Developed RESTful API (Express/MongoDB) with Multer-based evidence uploads and kanban-style dashboard (React/Zustand/MUI).
- > Integrated legal knowledge base with Fair Housing Act citations, defect awareness cards, and state-specific tenant rights comparisons.

DockForge

Docker · Bash · GitHub Actions

- > Built tool that provisions full stacks; auto-discovers apps under /app/ and /dockerfiles/ with zero config changes.
- > Implemented GitHub Actions CI/CD pipeline validating Dockerfiles in clean cloud environments.
- > Developed scripts reducing environment setup from hours to seconds.

DockForge OpenEnv

Docker · Bash · Python · LLM

- > Built AI agent evaluation platform where LLMs debug broken Docker and build configurations encoded from real-world failures.
- > Designed deterministic log simulation engine with progressive error exposure, order-dependent gating, and hidden regression testing.
- > Engineered session-isolated FastAPI server with context compression and deception-resistant "The Lie" scenario for the Meta PyTorch OpenEnv Hackathon.

Arch Linux Homelab + Android Chroot

Linux · Termux · Magisk · Bash

- > Manual Arch install: partitioning, kernel selection (linux-zen), and TUI display manager (Ly).
- > Configured chroot on rooted Android via Termux, bind-mounting /proc, /sys, /dev for near-native behavior.
- > Self-hosted Nextcloud and Nginx with SSL, VLANs, and reverse proxy.

SYSTEM_ADMIN

Windows Boot Failure Recovery

- > Diagnosed failure via live Linux USB + smartctl; used rsync for safe interruptible backup with metadata preservation.
- > Performed clean UEFI reinstall + diskpart partition letter fix.

Git/SSH Hackathon Debugging

- > Diagnosed GitHub failures on restricted networks; migrated remote URL to SSH using ed25519 keypairs.

[EXECUTION COMPLETE]
